

WARNING

Lawmakers want
to slip one by you.
They are after your
health insurance.
Do not fall for it.

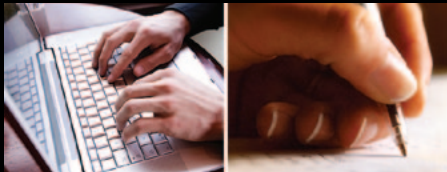

Higher costs and reduced health care benefits ahead!

Politicians in Olympia want to eliminate your current health care plan and force you into a new health care bureaucracy that will increase your costs, reduce your health care choices and cut your benefits. **This so-called “reform” makes no sense. Don’t fall for it!**

They’ve just conducted another study – the fifth study of its kind since 1989. Even though this latest study confirms that a state takeover will **COST MILLIONS MORE**, they are preparing legislation to force a state takeover of your health care.

Once again, a state takeover would be bad for you, bad for schools and devastating for taxpayers:

- For you personally, this could force you to change doctors, reduce your benefits, and increase your out-of-pocket costs.
- It would cancel benefits for thousands of part-time employees.
- It would eliminate choice and competition by giving the state a monopoly.
- And it would shift financial risk to school districts and cost taxpayers millions.

Email and write letters to your legislators to make them aware of these facts. For more information or to take action online, go to the WEA member political action Web site:
